

Nombre del alumno: Daniel Jiménez Pluma

Carrera: Ingeniería en Tecnologías de la Información e Innovación Digital

Matrícula: 2431124958

Nombre de la asignatura: Aplicaciones Web

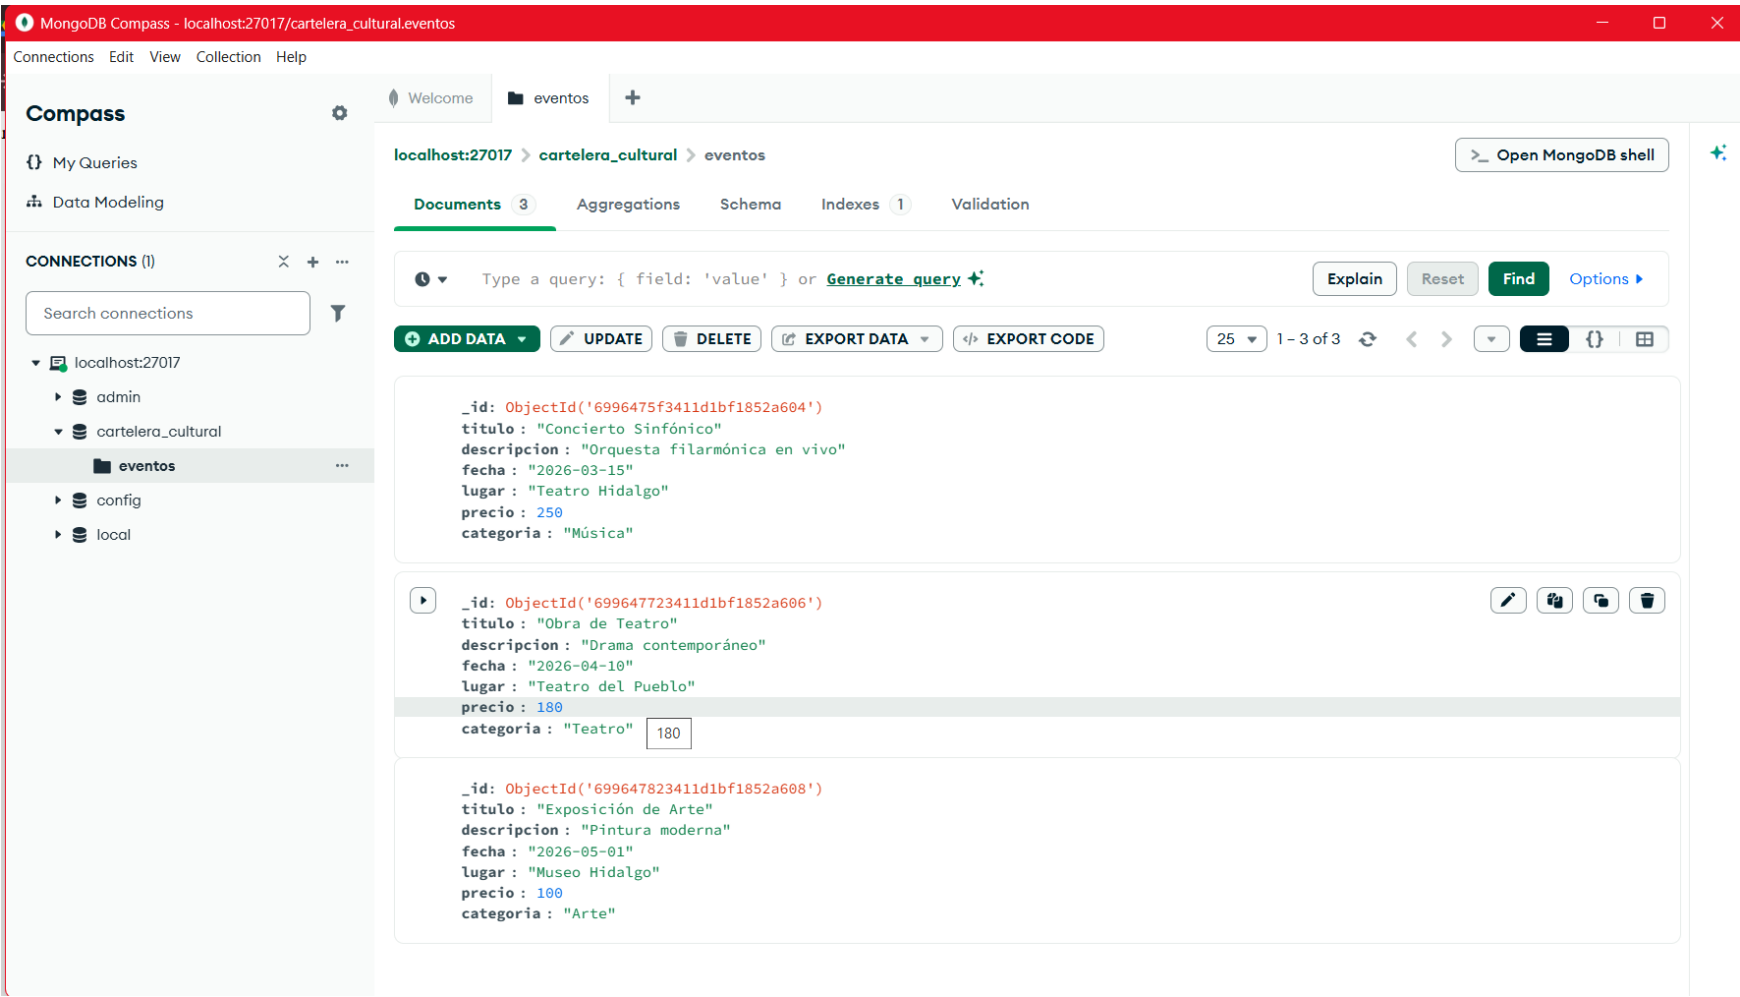

Nombre de la profesora: Diana Xóchitl Ruano Vargas

Actividad: Práctica 8 – Flask + MongoDB + Angular

Fecha: 19/02/2026

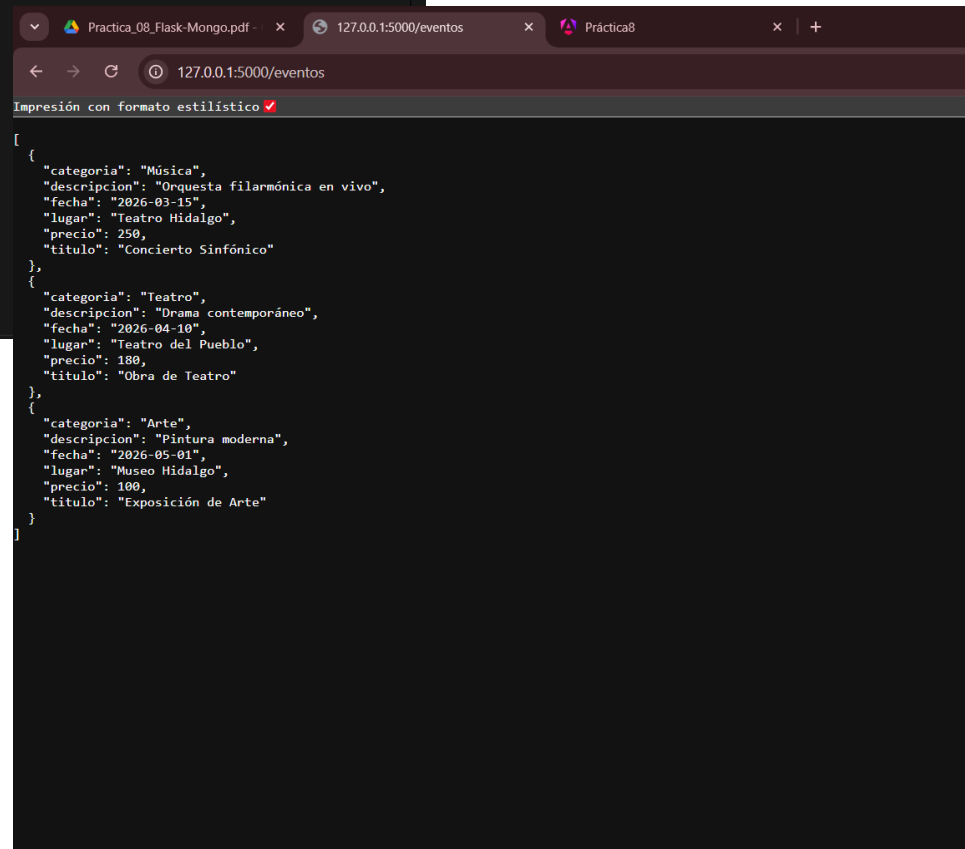

Captura de MongoDB con colección creada

Captura del JSON en navegador

```
(.venv) PS C:\Users\danie\OneDrive\Documentos\GitHub\Practicas_Web_DanielJimenez\practica8\backend> python app.py
* Serving Flask app 'app'
* Debug mode: on
WARNING: This is a development server. Do not use it in a production deployment. Use a production WSGI server instead.
* Running on http://127.0.0.1:5000

```

Captura de Angular mostrando tabla con datos de MongoDB

```
(.venv) PS C:\Users\danie\OneDrive\Documents\GitHub\Practicas_Web_DanielJimenez\practica8\practica8> ng serve
→ Local: http://localhost:4200/
→ press h + enter to show help
NG02801: Angular detected that `HttpClient` is not configured to use `fetch` APIs. It's strongly recommended to enable `fetch` for applications that use Server-Side Rendering for better performance and compatibility. To enable `fetch`, add the `withFetch()` to the `provideHttpClient()` call at the root of the application.
(node:668) [DEP0169] DeprecationWarning: `url.parse()` behavior is not standardized and prone to errors that have security implications. Use the WHATWG URL API instead. CVEs are not issued for `url.parse()` vulnerabilities.
(Use `node --trace-deprecation ...` to show where the warning was created)

Cartelera Cultural

Título	Fecha	Lugar	Precio
Concierto Sinfónico	15 de marzo de 2026	Teatro Hidalgo	250
Obra de Teatro	10 de abril de 2026	Teatro del Pueblo	180
Exposición de Arte	1 de mayo de 2026	Museo Hidalgo	100

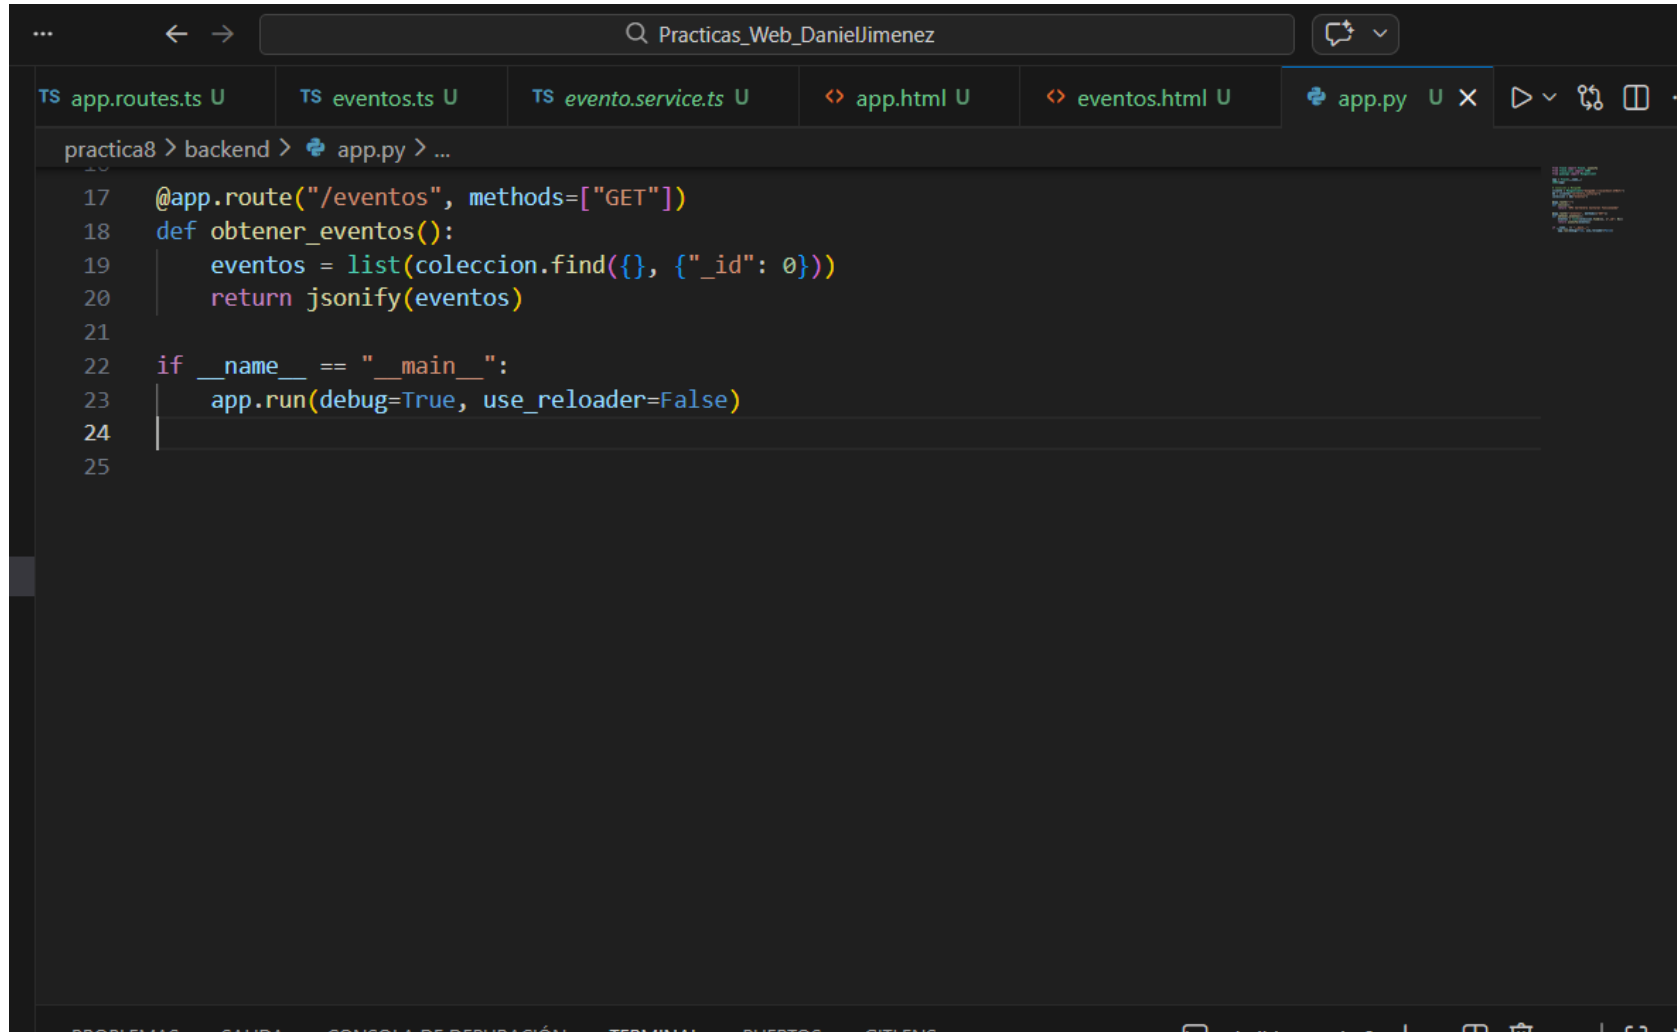

Captura del servicio de Angular

The image shows a screenshot of a Visual Studio Code editor window. The title bar at the top reads "Practicas_Web_DanielJimenez". The editor has several tabs open: "TS app.routes.ts U", "TS eventos.ts U", "TS evento.service.ts U X", "<> app.html U", "<> eventos.html U", "app.py U", and "TS". The active tab is "TS evento.service.ts U X". The breadcrumb navigation shows the path: "practica8 > practica8 > src > app > services > TS evento.service.ts > ...". The code in the editor is as follows:

```
1 import { HttpClient } from '@angular/common/http';
2 import { Injectable } from '@angular/core';
3
4 @Injectable({
5   providedIn: 'root'
6 })
7 export class EventosService {
8
9   private apiUrl = 'http://127.0.0.1:5000/eventos';
10
11   constructor(private http: HttpClient) {}
12
13   getEventos() {
14     return this.http.get<any[]>(this.apiUrl);
15   }
16 }
17
```

Captura de la ruta de flask

```
practica8 > backend > app.py > ...  
17 @app.route("/eventos", methods=["GET"])  
18 def obtener_eventos():  
19     eventos = list(coleccion.find({}, {"_id": 0}))  
20     return jsonify(eventos)  
21  
22 if __name__ == "__main__":  
23     app.run(debug=True, use_reloader=False)  
24  
25
```
